

## Instruction Manual Crimping Tool K 2

### 1. General Remarks

Before starting to use the tool please read the instruction manual carefully.

### 2. Technical Data

- Weight: 0,600 kg
- Length: ca. 325 mm
- Crimping Range: 0,75 to 16 mm<sup>2</sup> (Indent-Crimp) for tubular cable lugs  
"Standard Type"

### 3. Operation

To open the crimping tool press handles. Insert the connecting material into the proper crimping profile and close the crimping tool completely.

The crimping tool incorporates a ratchet mechanism which releases only after a full crimping cycle is completed.

In case of a wrong insertion of the connecting material the ratchet mechanism can be released by actuating the ratchet pawl (Pos. 1).

**Attention**  
*Do not use on live electrical circuits.*

Before starting to crimp please make sure that all parts involved in the crimping process are not energised.

### 4. Maintenance

The crimping tool has to be cleaned regularly and the bolt joints and ratchet mechanism have to be oiled regularly.
